The image features a dark blue background with a dynamic, wavy pattern of glowing blue and red dots. The dots are arranged in a series of overlapping, curved lines that create a sense of movement and depth. The colors transition from a bright blue on the left to a darker blue on the right, with a hint of red on the far left edge. The overall effect is reminiscent of a digital signal or a data stream.

- Integrity
- Innovation
- Client Success
- Global Perspective

*Fortex's flagship product. Enterprise solution for banks, exchanges, buy/sell side firms and the financial markets.*

### **Execution Management**

Manage execution with smart order routing, price validation, execution controls, and circuit breakers.

### **Pricing Management**

Optimize pricing strategies with Quote Maker, Synthetic Symbols for varied trading options, and Advanced Algorithmic Engine.

### **Account Management**

Effortlessly manage accounts, overseeing margin, commission, swap, and cooperation actions.

### **Connectivity Management**

Simplify connectivity with bridges, FIX 4.4, and other trading platforms.

### **Trading Frontends**

Access trading seamlessly through Fortex Desktop, Web Trader, Mobile Trader, and Fortex APIs.

### **Liquidity Management**

Maximize liquidity with an LP gateway, aggregation, hybrid pools, dark pool, central limit order book, and stale quotes filtering.

### **Reporting Management**

Optimize reporting with broker/LP analytics, PB settings, REST API, regulatory reporting, CRM, and APIs.

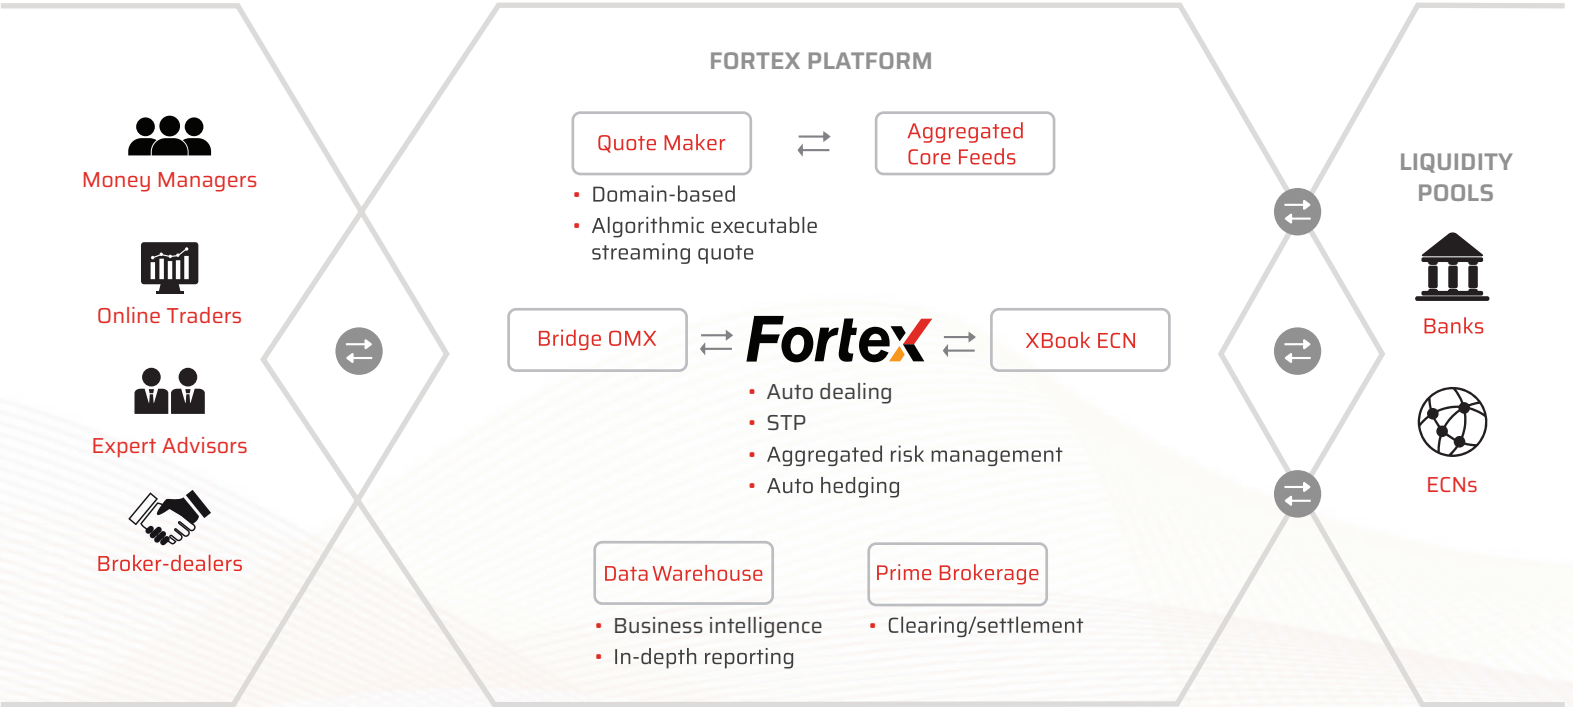

### **Risk Management**

Efficiently manage risk with order flow detection, auto-dealing, toxic flow guards, and limits, along with an OTC desk for hedge.

### **Robust IT Infrastructure**

Ensure a robust IT infrastructure with dedicated facilities at Equinix NY4, LD4, HK1, full redundancy, carrier-class network, and hot-swaps.

# X FORCE | TRADING PLATFORM

*The complete trading and Backoffice platform for brokers and fund managers.*

XForce combines streamlined trading, real-time analytics, and unmatched profitability in a single platform, elevating brokerage activities to new heights of efficiency and precision.

*Streamlined Trading, Real-Time Analytics, Unmatched Profitability.*

### **Advanced Trading Tools**

Access a wide range of advanced trading tools and features to enhance trading experience and efficiency.

### **Market Depth**

Access real-time market depth, including prices and trade history, to stay informed and make timely decisions.

### **Order Management**

Manage your orders with ease, including placing, modifying, and executing trades seamlessly.

### **Real-Time Market Data**

Access real-time market data, including prices, depth of market, and trade history, to stay informed and make timely decisions.

### **Charting and Analysis**

Utilize powerful charting capabilities and technical analysis tools to identify trends and make data driven decisions.

### **Multi-Asset Trading**

Trade a diverse range of assets, including forex, equities, commodities, and more, all within a single platform.

### **Trade Execution**

Manage and execute your trades with ease, including placing and modifying trades.

### **Multidevice Access**

Trade on the go with the XForce mobile app for iOS and Android and enjoy a seamless trading experience on desktop and Web platforms.

# X FORCE | BACKOFFICE

*A robust suite of tools and features, empowering businesses to optimize operational efficiency and control.*

Our Backoffice offers robust tools for exceptional operational efficiency. From workflow automation to real-time analytics, we optimize your business processes for peak performance.

### **Gateway to Liquidity Providers**

Efficiently access robust market liquidity by seamlessly connecting to a vast network of liquidity providers.

### **Account Management**

Effortlessly manage client accounts, onboarding, documentation, and monitoring, all from one platform.

### **Risk Management**

Use robust risk management tools for regulatory compliance, risk monitoring, and detecting suspicious activities.

### **Real-time Management**

Make informed, agile decisions based on real-time data for proactive responses to market changes and operational needs.

### **Reporting and Analytics**

Generate comprehensive reports, including trade summaries and financial statements, to gain insights and meet reporting requirements.

### **Symbol Management**

Streamline symbol organization and maintenance for enhanced operational efficiency.

### **IB Management**

Streamline IB relationships with effective commission tracking tools to drive business growth.

### **Managed Hosting**

A hassle-free, reliable solution. We handle setup, maintenance, and monitoring for optimal performance and minimal downtime.

### **Price Feed/Liquidity Management**

Ensure accurate pricing data and manage liquidity efficiently for optimal trading and a healthy market ecosystem.

### **Customization and Integration**

Customize the Backoffice system to match your business needs and integrate seamlessly with other systems or APIs.

# X AGGREGATOR | LIQUIDITY MANAGEMENT PLATFORM

*The advanced liquidity management platform for multi-asset brokers, trading firms, liquidity providers and technologies vendors.*

XAggregator, a robust SaaS platform for financial institutions, unites markets with unparalleled liquidity aggregation, versatile trading interfaces, comprehensive risk controls, precise execution, and seamless connectivity to trading platforms.

### **Seamless Execution Mode Switching**

Seamless execution mode transitions with real-time adjustments for efficient trade flow.

### **Managed Hosting**

Equinix-hosted environment with LP cross-connects, ultra-low latency, and robust IT infrastructure.

### **Optimized Spreads and Execution**

Tight spreads and precise execution with our advanced bid/offer aggregation for increased trading confidence.

### **Comprehensive Liquidity Access**

Harness 200+ liquidity sources, from top-tier banks, ECNs, and exchanges.

### **Real-time Monitoring and Analysis**

Real-time dashboards streamline oversight, risk management, and strategy optimization.

### **MetaTrader 4/5 Integration**

Seamless integration with MetaTrader via MT4 Bridge and MT5 Gateway for superior throughput.

### **Comprehensive Risk Management**

Effectively manage risk, including individual exposure limits, smart risk handling, and external LP interactions.

### **Liquidity Offering Versatility**

Empower liquidity provision with FIX API and bridge interfaces for serving diverse client needs.

### **Tailored Execution Models**

Flexible execution models: a-book, b-book, and tailored options for customizing your strategies.

### **Advanced Routing Rules**

Customize routing rules and markups for precise matching to client needs, symbol traits, and market conditions.
