PLATFORM**

www.fortex.com

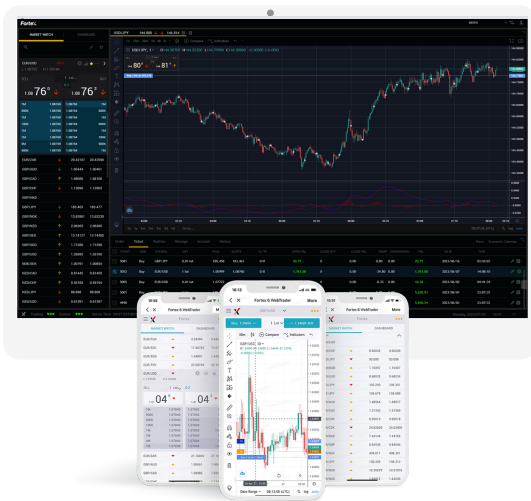

The complete trading and Backoffice platform for brokers & fund managers.

XForce combines streamlined trading, real-time analytics, and unmatched profitability in a single platform, elevating brokerage activities to new heights of efficiency and precision.

XForce Features

Streamlined Trading, Real-Time Analytics, Unmatched Profitability.

Advanced Trading Tools

Access a wide range of advanced trading tools and features to enhance trading experience and efficiency.

Charting and Analysis

Utilize powerful charting capabilities and technical analysis tools to identify trends and make data-driven decisions.

Real-Time Market Data

Access real-time market data, including prices, depth of market, and trade history, to stay informed and make timely decisions.

Order Management

Manage your orders with ease, including placing, modifying, and executing trades seamlessly.

Market Depth

Access real-time market depth, including prices, and trade history, to stay informed and make timely decisions.

Trade Execution

Manage & execute your trades with ease, including placing and modifying trades.

Multi-Asset Trading

Trade a diverse range of assets, including forex, equities, commodities, and more, all within a single platform.

Multidevice Access

Trade on the go with the XForce mobile app for iOS and Android, and enjoy a seamless trading experience on desktop & Web platforms.

XForce Trading Platform Suite attends to the diverse needs of financial institutions, leaving them worry-free in the world of trading.

XFORCE BACKOFFICE

A robust suite of tools & features for seamless and efficient operations, empowering businesses to optimize operational efficiency and control.

Our Backoffice offers robust tools for exceptional operational efficiency. From workflow automation to real-time analytics, we optimize your business processes for peak performance.

Gateway to Liquidity Providers

Efficiently access robust market liquidity by seamlessly connecting to a vast network of liquidity providers.

Risk Management

Use robust risk management tools for regulatory compliance, risk monitoring, and detecting suspicious activities.

Real-time management

Make informed, agile decisions based on real-time data for proactive responses to market changes and operational needs.

IB Management

Streamline IB relationships with effective commission tracking tools to drive business growth.

Customization and Integration

Customize the backoffice system to match your business needs and integrate seamlessly with other systems or APIs.

Account Management

Effortlessly manage client accounts, onboarding, documentation, and monitoring, all from one platform.

Symbol Management

Streamline symbol organization and maintenance for enhanced operational efficiency.

Managed Hosting

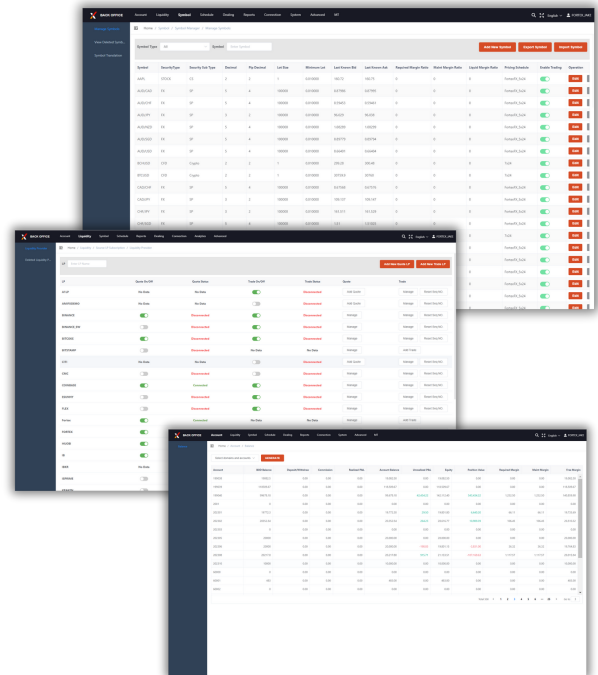

A hassle-free, reliable solution. We handle setup, maintenance, and monitoring for optimal performance and minimal downtime.

Reporting and Analytics

Generate comprehensive reports, including trade summaries and financial statements, to gain insights and meet reporting requirements.

Price Feed/Liquidity Management

Ensure accurate pricing data and manage liquidity efficiently for optimal trading and a healthy market ecosystem.

Why XForce

Elegant Interface

Our platform offers an easy-to-use interface, allowing traders to focus on trading.

Liquidity Neutral

We maintain liquidity neutrality, ensuring impartial access to liquidity without LP affiliations.

Any Device

Trade from any platform and device. Whether you prefer desktop, web, or mobile, XForce is at your fingertips.

Open Platform

Embrace an open platform, facilitating API connections and seamless third-party integration.

Built-in Liquidity Aggregator

Access multiple liquidity sources with our integrated LP Gateway, saving on bridge or aggregator expenses.

Advanced Charting

Effortlessly analyze market trends with advanced charting tools, including built-in TradingView charts and comprehensive analysis features.
